Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

- 1. (Currently Amended) A <u>piston ring made of a material for use as having a self-lubricating sliding parts property</u>, which consists of a steel comprising, by mass, from not less than 0.4 % to less than 1.3 % of C (carbon), 0.1 to 3.0 % of Si, 0.1 to 3.0 % of Mn, from zero (inclusive) to 0.5 % of Cr, 0.05 to 3.0 % of Ni, 0.7 to 2.0 % of Al, 0.3 to 20 % in total (Mo + W + V) of at least one element selected from the group consisting of Mo, W (tungsten) and V (vanadium), and 0.05 to 3.0 % of Cu, wherein there can be observed graphite particles having an average particle size of not more than 3 μ m in a section of a metal structure of a steel.
- 2. (Currently Amended) A material-piston ring according to claim 1, wherein the graphite particles observed in the section of the metal structure occupy an area rate of not less than 1 % in the overall area of the section, and have an average particle size of not more than 3 μ m.
- 3. (Currently Amended) A material piston ring according to claim 1, wherein no vanadium carbides are observed in the section of the metal structure.
- 4. (Currently Amended) A material-piston ring according to claim 1, wherein the steel contains, by mass, 0.3 to 5.0 % in total (Mo + W) of at least one element selected from the group consisting of Mo and W, and less than 0.1 % of V.
 - 5. (Canceled).
- 6. (Currently Amended) A material piston ring according to claim 1, wherein the steel contains, by mass, 1.5 to 3.0 % of Mo.

- 7. (Currently Amended) A material piston ring according to claim 1, wherein the steel contains, by mass, not more than 10 % of Co.
- 8. (Currently Amended) A material piston ring according to claim 1, wherein the steel contains, by mass, not more than 0.3 % of S (sulfur).
- 9. (Currently Amended) A material piston ring according to claim 8, wherein the steel further contains, by mass, not more than 0.01 % Ca.
- 10. (Currently Amended) A material-piston ring according to claim 1, wherein the steel has been subjected to nitriding treatment to use as sliding parts.
- 11. (Currently Amended) A <u>piston ring made from a</u> wire material-for use as piston rings, which consists of a steel comprising, by mass, from not less than 0.4 % to less than 1.3 % of C (carbon), 0.1 to 3.0 % of Si, 0.1 to 3.0 % of Mn, from zero (inclusive) to 0.5 % of Cr, 0.05 to 3.0 % of Ni, 0.7 to 2.0 % of Al, 0.3 to 20 % in total (Mo + W + V) of at least one element selected from the group consisting of Mo, W (tungsten) and V (vanadium), and 0.05 to 3.0 % of Cu, wherein there can be observed graphite particles having an average particle size of not more than 3 μ m in a section of a metal structure of the steel, and wherein sulfide inclusions observed in the section of the metal structure, being parallel to the periphery of the piston ring, are distributed such that straight lines each passing through a major axis of the respective sulfide inclusion cross one another within a cross angle of not more than 30 degrees which angle is referred to as a degree of parallelism.
- 12. (Currently Amended) A wire material piston ring according to claim 11, wherein graphite particles observed in the section of the metal structure occupy an area rate of not less than 1 % in the overall area of the section, and have an average particle size of not more than 3 μm.

- 13. (Currently Amended) A wire material piston ring according to claim 11, wherein the steel contains, by mass, not more than 10 % of Co.
- 14. (Currently Amended) A wire material piston ring according to claim 11, wherein the steel contains, by mass, not more than 0.3 % of S (sulfur).
- 15. (Currently Amended) A wire material piston ring according to claim 14, wherein the steel further contains, by mass, not more than 0.01 % of Ca.
- 16. (Currently Amended) A wire material piston ring according to claim
 11, wherein the steel has been subjected to nitriding treatment to use as piston rings.
- 17. (Currently Amended) A wire material piston ring according to claim 11, wherein the steel has been forged, drawn and/or rolled from an ingot.
- 18. (Currently Amended) A wire material piston ring according to claim 17, wherein the wire material has been annealed and subjected to quenching and tempering.
 - 19.-21 (Canceled).
